I Papers

The Microscopical Origin of Barkhausen Noise: a Review of Recent Results	11
<i>G. Durin</i> – IEN Galileo Ferraris, Torino, Italy <i>S. Zapperi</i> – INFN-SMC Unità di Roma 1, Roma, Italy	
Multiparametric Barkhausen Noise Measurements for Stress and Microstructure Evaluation	19
<i>G. Donzella, A. Flammini, E. Sardini, E. Sisinni, L. Solazzi</i> – University of Brescia, Italy	
New Capabilities for Stress Measurement Integrated in the Next Generation of BN Instruments "Introscan"	31
<i>V. Vengrinovich, V. Tsukerman</i> – R&D "Diagnostics" (Minsk), Belarus	
Detection of Thermal Damage in X2M Gear Steel Using Barkhausen Noise Analysis	39
<i>V. Champagne, P. Sincebaugh, M. Pepi, D. Snoha</i> – U.S. Army Research Laboratory (Aberdeen), USA	
Industrial Application of a Complete Process of Improvement of the High Precision Bearings Service Life; Pre-Stress, Barkhausen Noise	49
<i>S. Desvaux, J. Gualandri, H. Carrerot, A. Lamare</i> – SNFA, France	
Application of Barkhausen Noise Inspection to Determine Residual Stress in Landing Gear Component	63
<i>W. Dabrowski, R. Eybel</i> – Messier-Dowty Inc., Canada	
Quality Monitoring in Crankshaft Grinding by Barkhausen Noise Measurements	73
<i>B. Denkena, J. Cord Becker, F. Stimpel</i> – University of Hannover, Germany	
Effect of Applied and Residual Stresses on the Magnetic Barkhausen Emission Profile in Case-Carburised En36 Steel	85
<i>V. Moorthy, M. Blaow, B.A. Shaw</i> – University of Newcastle Upon Tyne <i>K. Brimble, S. Day</i> – MoD(N), United Kingdom	
Effect of Cyclic Deformation on Barkhausen Noise in a Mild Steel	95
<i>M. Lindgren, T. Lepistö</i> – Tampere University of Technology, Finland	
Inspection Of Magnetic Circuit Components Using the Barkhausen Noise Technique	107
<i>V. Ochodek, V. Stýskala</i> – VSB Technical University of Ostrava, Czech Republic	
On the Inspection of Body Force of High Strength Bolts	115
<i>Gy. Posgay, Z. Marek, N. Takacs</i> – Metalelektro Ltd. Budapest <i>L. Imre</i> – ÉMI-TUV Bayern Ltd. (Budapest), Hungary	
The Characterisation of Work-Hardened Austenitic Stainless Steel by NDT Micro-Magnetic Techniques	123
<i>D O'Sullivan, M Cotterell</i> – Cork Institute of Technology, Ireland <i>I. Mészáros</i> – Budapest University of Technology and Economics, Hungary	

Improvement of the Quality Inspection of Aerospace Bearings Using the Magnetic Barkhausen Noise Analysis	131
<i>M. Mourglia</i> – SKF Avio, Italy <i>E. Bruno</i> – ErreBi Instrumentazioni, Italy <i>A. Wojtas</i> – Stresstech Oy, The Netherlands	
Shot Peening on Pelton Wheels: Method of Control and Results	151
<i>P. Marconi</i> – 2EFFE Engineering s.r.l., <i>M. Lauro, W. Bozzolo</i> – ENEL PRODUZIONE S.p.A. (Torino), Italy	
Detection and Quantification of Grinding Damage by Using EC and 3MA Techniques	159
<i>B. Wolter, W. Theiner, R. Kern, R. Becker, Ch. Rodner</i> – Fraunhofer Institut für Zerstörungsfreie Prüfverfahren, Germany <i>P. Kreier</i> – Innotest AG, Germany <i>P. Ackeret</i> – Sultex AG, Germany	
Validity of Barkhausen Measurements Made on KLST Mini-Specimens of Model Alloys Steels	171
<i>L. Debarberis, S. Pirfo, B. Acosta, F. Sevini</i> – J.R.C. Institute for Energy, The Netherlands	
Fatigue Crack-Growth Characterization in Carbon Steel Piping Using Barkhausen Noise Measurement	181
<i>H.N. Singh, K.C. Sahoo, P.K. Singh, H.S. Kushwaha</i> – Bhabha Atomic Research Centre (Mumbai), India	
Residual Stress Evaluation in Oil Pipeline	187
<i>B. Augustyniak, M. Chmielewski, L. Piotrowski</i> – Technical University of Gdansk, Poland <i>T. Skibinski, D. Mezyk</i> – Institute of Energy (Warsaw), Poland	
Robot Controlled Grinding Process Inspection by Barkhausen Noise Analysis on Spiral Bevel Gears	199
<i>D. Dapprich</i> – Stresstech GmbH, Germany <i>K. Sattelberger</i> – ZF Thyrnau, Germany	
Calibration of Various Sensor Units by Using Different Parameters of the Magnetic Barkhausen Noise	211
<i>J. Grum, B. Pecnik</i> – Faculty of Mechanical Engineering Ljubljana, Slovenia	
II Posters	
Sheet Characterisation by Barkhausen Noise Measurement	223
<i>B. Denkena, J. Cord Becker, F. Stimpe, B. Breidenstein</i> – University of Hannover, Germany	
On the Relation Between Stress and Barkhausen Noise in a Duplex Stainless Steel	235
<i>M. Lindgren, T. Lepistö</i> – Tampere University of Technology, Finland	
Interpretation of Barkhausen Noise Measurements for the Determination of Biaxial Stress States	243
<i>G. Donzella, L. Solazzi</i> – University of Brescia, Italy	
New Measurement and Processing Techniques of the Barkhausen Noise	255
<i>A. Flammini, D. Marioli, E. Sardini, E. Sisinni, A. Taroni</i> – University of Brescia, Italy	
Evolution of Post-Welded Residual Stress due Multilayer Circumferential Weld of Tube	267
<i>W. Kielczynski, B. Augustyniak, T. Kowalek, M. Chmielewski</i> – Technical University of Gdansk, Poland	

4th International Conference on Barkhausen Noise and Micromagnetic Testing
July 3 – 4, 2003, Brescia – Italy
Università degli Studi di Brescia

- Evaluation of Case-Depth in Case-Carburised Gear Steels Using Magnetic Barkhausen Emission Technique** 275
V. Moorthy, M. Blaow, B.A. Shaw – University of Newcastle Upon Tyne
K. Brimble, S. Day – MoD(N), United Kingdom
- Study of Applied Bending Stress Effects on Magnetic Barkhausen Noise Profile in Induction Hardening Steel** 287
M. Blaow, V. Moorthy, J.T. Evans, B. Shaw – University of Newcastle Upon Tyne
K. Brimble, S. Day – MoD(N), United Kingdom
- Barkhausen Signal Evaluation to Characterise Degradation Processes in Standard and Vanadium Modified 2.25Cr-1Mo Steel** 301
S. Pirfo, L. Debarberis, G. Manna, P. Castello – JRC Institute for Energy, The Netherlands
- Testing Barkhausen Noise Analysis to Measure Residual Stresses in Mill Roll Alloys** 311
A. Tremea – INNSE CILINDRI srl
G. Nardoni, – I&T Nardoni Institute (Brescia), Italy
V. Vengrinovich – Institute of Applied Physics (Minsk), Belarus
- The Attempt to Estimate Properties of a Machine Part Surface Layer Using Wavelet Transform of the Barkhausen Signal** 323
C. Kownacki, J. Blachnio – Technical University of Bialystok
- A Study of Stress Distribution on the Elbow of a Carbon Steel Pipe under Load Using Barkhausen Noise Analysis** 333
H.N. Singh, M.P. Dhotre, K.C. Sahoo – Bhabha Atomic Research Centre (Mumbai), India
- Correlation Between Barkhausen Noise and Residual Stress Analysis in AISI M50 Bearings** 341
M. Mourglia, S. Aiazzone, G. Bardelli, A. Ferla – SKF Avio, Italy
- Non-Destructive Evaluation of Residual Stress Depth-Profiles by Barkhausen Noise Analysis and Their Validation by XRD Method Combined with Electrochemical (destructive) Surface Removal** 361
P. Jacob, S. Marrone – Sonats, France
L. Suominen, V. Honkamaki – Stresstech Oy, Finland
- The Barkhausen Method for Residual Stress Control** 369
G. Scavino, G. Ubertalli, A. Di Vincenzo – Politecnico di Torino, Italy
- Determination of Variations of Hardness and Residual Stresses Based on the Magnetic Barkhausen Noise for Induction-Hardened Layers of Different Thickness** 379
J. Grum, P. Žerovnik – Faculty of Mechanical Engineering Ljubljana, Slovenia
- Micro-Structure Characterisation by Barkhausen Noise of Thermally Treated Steel** 391
M. Zergoug, A. Benchaala – Laboratoire d'Electronique et d'Electrotechnique Centre de soudage et de contrôle Chéraga, Alger
S. Leballi – Faculté de génie et process, USTHB, Bab Ezzouar Algiers
H. Boudjellal – Institut d'aeronautique Université de Blida
- Barkhausen Noise Control of a Grinding Process of Nitrided Camshafts** 401
S. Albieri – Ferrari Gestione Sportiva
A. Wojtas – Stresstech Oy
