Barkhausen Noise in Industrial Application

Using the Barkhausen Noise for Process Optimisation and Process Control – An Example for the Production of Gears – <i>K. Dünck-Kerst</i> Siemens AG Mechanical Drives Business Unit, Bocholt, Germany	9
Magnetic Barkhausen Emission Measurements for Evaluation of Depth of Grinding Damage <i>V. Moorthy, B. A. Shaw</i> Design Unit, Newcastle University, UK	21
Using Barkhausen Noise for the Characterisation of Grinding Burn	
Influence of Grinding Burn on the Load Carrying Capacity of Parts under Rolling Stress <i>F. Klocke, C. Gorgels, J. Reimann</i> WZL, RWTH Aachen University, Germany	33
Indicating Grinding Burn on Gears – Comparison and Evaluation of Different Testing Methods <i>B.-R. Höhn, P. Oster, T. Tobie, S. Schwienbacher, P. Koller</i> FZG, TU München, Germany	43
Characterizations of Thermal Damage by Magnetic Parameters Based on Fatigue Properties <i>Y. Xiaowei¹, W. Hong¹, Z. Yue², Z. Jianguo¹</i> ¹ School of Material Science and Engineering, Northwestern Polytechnical University, Xi'an, China ² Nondestructive Test Centre, Chengdu Aircraft Industrial (group) co.ltd., Chengdu, China	53
Comparative Measurements of the Stress State in a Power Plant Pipe Using Barkhausen Effect and Mathar's Techniques <i>B. Augustyniak¹, M. Chmielewski², L. Piotrowski³, T. Skibinski³, M. Jaworski³, D. Mezyk³</i> ¹ Gdansk University of Technology, Physics Department, Poland ² Gdansk University of Technology, Mechanical Department, Poland ³ Energy Power Institute, Warsaw, Poland	63
Characterization of Laser and Induction Simulated Grinding Burns with Barkhausen Noise Measurements <i>S. Santa-aho¹, M. Vippola¹, T. Lepistö¹, M. Lindgren², J. Siiriäinen³, J. Latokartano⁴, I. Virkkunen⁵, M. Kemppainen⁵</i> ¹ Department of Materials Science, Tampere University of Technology, Finland ² Outotec Research Oy, Pori, Finland ³ Stresstech Oy, Vaajakoski, Finland ⁴ Laser Application Laboratory, Tampere University of Technology, Finland ⁵ Trueflaw Ltd., Espoo, Finland	73
Using Barkhausen Noise for the Characterisation of Material Properties	
An Entropy-Based Approach for the Analysis of the Barkhausen Noise Signal <i>A. Sorsa, K. Leiviskä</i> Control Engineering Laboratory, University of Oulu, Finland	85
Study of Shot-Peened Austenitic Stainless Steel 304L Using the Barkhausen Noise Technique <i>X. Kleber¹, S. Pirfo Barroso¹, S. SAILLET², A. Vincent¹</i> ¹ Université de Lyon, INSA-Lyon, France ² EDF, Site des Renardières, France	97

Barkhausen Noise and PM

- Investigation of the Structure of Ferro-magnetic Materials Using Methodology based on Barkhausen effect** 109

G. Velev¹, A. Markovski²

¹Institute of Mechanics, Bulgarian Academy of Sciences, Bulgaria

²Technical University of Sofia, Bulgaria

New Possibilities and Applications Using Barkhausen Noise

- Optimizing Magnetization Parameters of Magnetic Barkhausen Noise for More Accurate Detection of Residual Stresses and Variations in Microstructure** 117

J. Thomas, R. M. Fix

American Stress Technologies Inc., Cheswick, PA, USA

- Magnetic Barkhausen Noise Analysis in the Audio Frequency Range** 123

K. Szielasko, M. Rabung, I. Altpeter

Fraunhofer IZFP, Saarbrücken, Germany

- New Approach in Analysing Barkhausen Noise to Separate Changes in Stress and Hardness in 100Cr6 and 16MnCr5 Steel** 135

F. Jerabek, C. Scheer

Stresstech GmbH, Höhn, Germany

- Monitoring the Microstructural Evolution in Spheroidised Steel by Magnetic Barkhausen Noise Measurement** 143

K. Davut¹, C. H. Gür²

¹Max Planck Institute for Iron Research, Düsseldorf, Germany

²Middle East Technical University, Ankara, Turkey

- Assessment of Turbine Blades State Using Barkhausen Effect** 151

B. Augustyniak¹, M. Chmielewski¹, P. Kotula¹, M. Miscicki², A. Seniuk²

¹Gdansk University of Technology, Physics Department, Poland

²Alstom Power, Elblag, Poland

Guideline for the Measurement

- Calibrating Barkhausen Noise Systems in Accordance with Current International Standards/Specifications** 163

S. J. Kendrish, J. Thomas, R. M. Fix

American Stress Technologies Inc., Cheswick, PA, USA
